Faculty	Faculty of Education
University	Jamia Millia Islamia
Programme	M.Ed.
Academic Session	2027-28
Assessment	Written Entrance Test

Official Scope of the Written Test

The written test will cover various aspects related to education. The syllabus supplied by the Department of Educational Studies identifies the following broad areas:

1. Philosophical Basis of Education

Elementary knowledge and general understanding of the philosophical basis of education.

2. Sociological Basis of Education

Elementary knowledge and general understanding of the sociological basis of education.

3. Children's Learning and Development

Understanding the processes through which children learn and develop.

4. Contexts, Issues and Problems of Education

Awareness and understanding of educational contexts, major issues and problems related to education.

5. Educational Policies, Committees and Commissions

Knowledge of policies, committees and commissions concerned with education.

6. Methods of Teaching

General understanding of methods and approaches used in teaching.

7. Evaluation

Elementary understanding of evaluation in the educational process.

8. Elementary Statistics

Basic statistical understanding relevant to education.

9. Teaching Aptitude

Questions assessing aptitude and suitability related to teaching and educational situations.

10. Social and Current Issues Related to Education

Awareness of contemporary social issues and current developments related to education.

Meer Sir Academy - Preparation Framework

For systematic preparation, Meer Sir Academy can organise the notified syllabus into the following study blocks. These are preparation categories based on the broad areas supplied above and do not add new officially notified syllabus requirements.

Preparation Unit	Coverage
Foundations of Education	Philosophical and sociological bases of education.
Learner & Development	Children's learning and development.
Contemporary Education	Contexts, issues and problems of education; social and current educational issues.
Policy & Educational Development	Policies, committees and commissions on education.
Teaching-Learning Process	Methods of teaching and teaching aptitude.
Assessment & Evaluation	Evaluation and its role in education.
Basic Quantitative Understanding	Elementary statistics relevant to educational questions.

Recommended Preparation Approach

- Build conceptual clarity in the philosophical and sociological foundations of education.
- Revise major ideas concerning children's learning and development.
- Prepare educational policies, committees and commissions through concise chronological notes.
- Practise questions on teaching methods, evaluation, elementary statistics and teaching aptitude.
- Follow important social issues and current developments specifically connected with education.
- Use regular objective-question practice and mixed-topic revision to integrate all syllabus areas.
